The chemagic Dispenser

- **High accuracy**
 - Each manifold is controlled by a single membrane pump
- **Easy access to buffers**
 - Buffer canisters are placed at the left hand site in front of the x-axis
- **Speed**
 - Dispensing of buffers is performed within the NA isolation protocols

chemagic 96 Rod Head

Your benefits

- **Saving of time during set up**
 - **No manual pipetting or dispensing of wash-, binding- and lysis buffer**
- **Improved process safety by reduced error risk**
 - **Tubes/plates are prefilled online**
- **Fully automated NA isolation protocol**
 - **No more interruptions for manual steps during the isolation process**
